SUMMARY

Recent MSc Computer Science (Distinction) graduate with a strong foundation in machine learning, cloud technologies, and full-stack development. Proven experience as a Machine Learning Engineer, Data Analyst, and Software Developer in both startups and enterprise environments. Adept at designing ML models, working with SQL and relational databases, and deploying solutions on AWS and Azure. Passionate about continuous learning, innovation, and solving real-world problems through data science and artificial intelligence. Highly collaborative and effective communicator who thrives in fast-paced, data-driven teams.

CORE SKILLS

- **Programming Languages:** Python (Advanced), JavaScript
- **ML & AI Frameworks:** Scikit-learn, TensorFlow, Keras, PyTorch, Hugging Face, Azure ML Studio
- **Data & Analytics:** SQL, Power BI, Tableau, Pandas, Numpy, Apache Airflow, Data Structures & Algorithms
- **Cloud & DevOps:** AWS, Azure, Docker, Heroku, CI/CD Pipelines
- **Front-End/Back-End:** React, HTML, Bootstrap, Flask, FastAPI, Django
- **LLM/NLP:** OpenAI, Hugging Face Transformers, LangChain, RAG Pipelines, Prompt Engineering
- **Tools:** Git, Firebase, Postman, JIRA, MS Excel, Anaconda

PROFESSIONAL EXPERIENCE

Outwood Academy Riverside, United Kingdom

Cover Supervisor(Administrator) (January 2025 – Present)

- Delivered computing (Python), IT, and math lessons, tailoring instruction to student understanding.
- Diagnosed knowledge gaps with analytical thinking—translating to structured teaching and rapid issue resolution.
- Managed operational tasks like teacher cover rotas, building resilience, communication, and problem-solving skills.
- Supported students in using coding and educational platforms—reinforcing digital fluency and independent learning.

Connex Education, United Kingdom

Teacher(Supply/Cover Supervisor) (May 2023 – Oct 2024)

- Delivered clear and engaging explanations of key concepts in Python, computing, and mathematics
- Designed and implemented tailored learning strategies to support individual and group progress
- Successfully managed multiple classrooms across a range of subjects and year groups
- Supported students in developing problem-solving skills and exam techniques
- Assessed student engagement and learning during cover lessons.

Upwork, United Kingdom

Freelancer (Software Engineer) (May 2023 – Oct 2024)

- Developed ML-integrated applications using Python, FastAPI, and cloud services (AWS/Azure).
- Created dashboards and pipelines using SQL, Pandas, and Power BI, empowering clients with real-time insights.
- Built a data validation/reporting tool for a FinTech client—automating compliance and cutting manual effort by 60%.
- Designed RAG pipelines and integrated LLMs for summarization and classification tasks using Hugging Face/OpenAI.
- Maintained agile practices, test-driven development, and collaborated with cross-functional teams (PMs, UI/UX).

Impact Fundry, United Kingdom

Business Analyst (Data Science) (Oct 2022 – May 2023)

- Led analysis of business workflows, boosting efficiency and sales by 20%.
- Built LLM-powered internal tools for summarization, retrieval, and automation.
- Designed FAISS-based RAG systems for contextual document search, reducing lookup time.
- Maintained clean documentation, bridging the gap between business and technical teams.

Turing, Palo Alto, California

Data Analyst (Mar 2022 – Sept 2022)

- Built Apache Airflow DAGs, cutting task latency by 35%.
- Designed a real-time SLA alert system using Slack webhooks.
- Developed RESTful APIs and optimized database queries to improve app performance by 30%.
- Delivered robust Power BI dashboards to monitor key KPIs in real-time.

Law Pavilion, Lagos, Nigeria

Machine Learning Engineer (Dec 2020 – Feb 2022)

- Spearheaded the development of a document summarization platform using Hugging Face, improving document processing speed by 40%.
- Employed Doc2Vec for extracting legal headings, increasing information retrieval efficiency by 35%.
- Led the development of a Speech-To-Text model for courtroom applications, achieving 90% accuracy.
- Maintained data standards through validation, verification, and quality assurance, using Power BI.
- Developed a model for recognizing laws and cases within documents using Prodigy, improving accuracy by 30%.
- Designed an NLP-based model for identifying relevant case principles, reducing legal research time by 25%.
- Engineered efficient APIs using FastAPI for seamless data interaction, increasing system integration efficiency by 20%.

PWC, Lagos, Nigeria

Software Engineer (July 2020 – Dec 2020)

- Generated data insights that improved business processes by 15%.
- Developed expertise in Data Lifecycle Management (DLM), Privacy & Governance.
- Built backtested credit risk models, ensuring compliance with financial regulations.

Fundall, Lagos, Nigeria

Artificial Intelligence Engineer (Apr 2020 – July 2020)

- Created a conversational chatbot using Python, increasing user engagement by 30%.
- Developed endpoints for a categorizer model, automating item categorization with 95% accuracy.
- Implemented an OCR model for scanning receipts, achieving 90% accuracy in item categorization.
- Developed an OCR model for extracting identity information, with an 85% accuracy rate.
- Built a sentiment analysis model using Twitter data, providing valuable customer insights and improving customer sentiment analysis accuracy by 25%.
- Created detailed visual reports in Power BI to present sentiment analysis results to stakeholders, improving data-driven decision making by 20%.
- Collaborated closely with risk management, data engineering, and product teams to generate insights and integrate risk models into the credit decisioning process, aligning model outputs with business objectives.

EDUCATION

- **University of Lagos, Lagos, Nigeria**
Bachelor of Science in Electrical/Electronic Engineering (Oct 2014 - Dec 2019)
- **Teesside University, Middlesbrough, United Kingdom**
Masters in Computer Science (Distinction) (Sept 2022 - Sept 2023)
 - Analyzed NBA player statistics of custom datasets over ten seasons using Microsoft Power BI, developing multi-page dashboards, improving data visualization techniques by 20%.
- **West African Examination Council(WAEC), Nigeria**
GCSE Mathematics and English Equivalent
 - A1 Mathematics B2 English 3 other B's and 2 C's

PERSONAL INTERESTS

- Cooking
- Basketball
- Video making and editing
