SUMMARY

I hold a master's degree in Computer Science (Distinction) and a degree in Electrical and Electronics Engineering, with exceptional scores in mathematics. With experience as an analyst, ML engineer, and AI engineer, I specialize in developing machine learning models, optimizing business intelligence systems, and delivering data-driven insights. Proficient in Python, PowerBI, SQL, and cloud technologies, I excel in solving complex problems, collaborating cross-functionally, and applying mathematical expertise to AI. My work accelerates innovation and drives impactful, strategic decision-making through data analysis and full-stack development.

CORE SKILLS

- *Programming Languages: Python (Advanced), JavaScript*
- *Front-End: HTML, React, Bootstrap*
- *Back-End: Python, Flask, FastAPI*
- *Data Science and Machine Learning: Azure ML Studio, AI with Python, NLP, OCR, Scikit-learn, TensorFlow, Keras, Pandas, Numpy, Matplotlib, Anaconda, SpaCy, Hugging Face, Django, Apache Airflow, Dashboards, Analytics*
- *Others: Data Structures & Algorithms, Data Analytics, Mathematics, MS Excel, Tableau, Power BI, Git, MySQL, Prodigy, Firebase ML Kit & Database, Postman, Heroku, Google Cloud Platform*
- *LLM Technologies: OpenAI, Azure OpenAI, Hugging Face Transformers, LangChain, RAG Pipelines*
- *Prompt Engineering: Zero-shot/few-shot prompting, instruction tuning, evaluation*

PROFESSIONAL EXPERIENCE

Outwood Academy Riverside, United Kingdom

Cover Supervisor(Administrator) (January 2025 – Present)

- Supervised classes across computing (Python), IT, and mathematics, delivering pre-planned lessons while adapting content in real time to suit varying levels of understanding—demonstrating flexibility, classroom control, and an ability to think on your feet.
- Designed and implemented tailored learning strategies to bridge knowledge gaps, using a structured, diagnostic approach similar to identifying and resolving technical issues—skills that ensured continuity of learning during teacher absence.
- Delivered engaging lessons and maintained student focus by breaking down complex concepts into clear, accessible steps—fostering a calm, purposeful learning environment.
- Managed the daily cover rota, coordinating teacher absences and deploying staff efficiently—developing key operational planning, prioritization, and communication skills to maintain smooth school operations.
- Supported students in using educational technologies, including coding platforms and productivity tools—building rapport and guiding independent learning while reinforcing technical literacy.

Connex Education, United Kingdom

Teacher(Supply/Cover Supervisor) (May 2023 – January 2025)

- Delivered clear and engaging explanations of key concepts in Python, computing, and mathematics, adapting content to suit different learning abilities—demonstrating the ability to communicate effectively with diverse groups of students.
- Designed and implemented tailored learning strategies to support individual and group progress, applying strong analytical thinking and classroom awareness to meet learners' needs.
- Successfully managed multiple classrooms across a range of subjects and year groups, displaying adaptability, time management, and the ability to maintain focus and discipline in a dynamic school environment.
- Supported students in developing problem-solving skills and exam techniques, fostering resilience, independent thinking, and academic confidence—essential for maintaining continuity of learning in the absence of the regular teacher.
- Assessed student engagement and learning during cover lessons, using initiative and reflective practice to adjust delivery and maintain a positive, productive classroom atmosphere.

Impact Fundry, United Kingdom

Business Analyst (Data Science) (Oct 2022 – May 2023)

- Analyzed business processes and goals to drive efficiencies through technology and data, increasing sales by 20%.
- Managed Business Intelligence workflow using Power BI, ensuring 100% task completion accuracy and timeliness.
- Designed and deployed internal tools powered by LLMs (OpenAI/GPT-based), enabling automation of knowledge retrieval, document summarization, and email drafting workflows.
- Built and maintained Retrieval-Augmented Generation (RAG) pipelines using FAISS and SentenceTransformers, enabling contextual search across internal documentation.
- Developed intelligent interfaces using prompt engineering best practices, increasing tool reliability and output quality.
- Prepared clear documentation, to communicate effectively business requirements and technical specifications, reducing project ambiguities by 40%.

Turing, Palo Alto, California

Data Analyst (Mar 2022 – Sept 2022)

- Developed Directed Acyclic Graphs (DAGs) on Apache Airflow, reducing task scheduling time by 35%.
- Implemented a real-time SLA alert system using Slack webhooks, improving monitoring efficiency by 40%.
- Created and maintained technical and operational documentation, ensuring compliance with business and regulatory requirements.
- Conducted complex data analysis using SQL, improving query performance by 25%.
- Designed and implemented full-stack solutions, reducing development time by 20%.
- Developed RESTful APIs and optimized database queries, enhancing system performance by 30% thereby increasing sales.
- Maintained BI dashboards and reports in Power BI, providing real-time high quality visual interfaces for key business metrics, improving business growth.

Law Pavilion, Lagos, Nigeria

Machine Learning Engineer (Dec 2020 – Feb 2022)

- Spearheaded the development of a document summarization platform using Hugging Face, improving document processing speed by 40%.
- Employed Doc2Vec for extracting legal headings, increasing information retrieval efficiency by 35%.
- Led the development of a Speech-To-Text model for courtroom applications, achieving 90% accuracy.
- Maintained data standards through validation, verification, and quality assurance, ensuring 99% accuracy in reporting using Power BI.
- Developed a model for recognizing laws and cases within documents using Prodigy, improving accuracy by 30%.
- Designed an NLP-based model for identifying relevant case principles, reducing legal research time by 25%.
- Engineered efficient APIs using FastAPI for seamless data interaction, increasing system integration efficiency by 20%.

PWC, Lagos, Nigeria

Software Engineer (July 2020 – Dec 2020)

- Managed stakeholder expectations, offered support services and communicated results effectively, achieving a 95% satisfaction rate.
- Generated actionable insights, leading to a 15% improvement in business processes.
- Gained expertise in Data Lifecycle Management (DLM), contributing to a 20% improvement in data handling.
- Developed knowledge of Data Protection and Data Governance, ensuring compliance with regulations.
- Managed critical business tasks from inception to launch, achieving a 100% project completion rate within budget.
- Conducted rigorous backtesting and validation of credit risk models, ensuring compliance with finance regulatory standards.

Fundall, Lagos, Nigeria

Artificial Intelligence Engineer (Apr 2020 – July 2020)

- Created a conversational chatbot using Python, increasing user engagement by 30%.
- Developed endpoints for a categorizer model, automating item categorization with 95% accuracy.
- Implemented an OCR model for scanning receipts, achieving 90% accuracy in item categorization.
- Developed an OCR model for extracting identity information, with an 85% accuracy rate.
- Built a sentiment analysis model using Twitter data, providing valuable customer insights and improving customer sentiment analysis accuracy by 25%.
- Created detailed visual reports in Power BI to present sentiment analysis results to stakeholders, improving data-driven decision making by 20%.
- Collaborated closely with risk management, data engineering, and product teams to generate insights and integrate risk models into the credit decisioning process, aligning model outputs with business objectives.

EDUCATION

- **University of Lagos, Lagos, Nigeria**

Bachelor of Science in Electrical/Electronic Engineering (Oct 2014 - Dec 2019)

- **Teesside University, Middlesbrough, United Kingdom**

Masters in Computer Science (Distinction) (Sept 2022 - Sept 2023)

→ Analyzed NBA player statistics of custom datasets over ten seasons using Microsoft Power BI, developing multi-page dashboards, improving data visualization techniques by 20%.

- **West African Examination Council(WAEC), Nigeria**

GCSE Mathematics and English Equivalent

→ A1 Mathematics B2 English 3 other B's and 2 C's

PERSONAL INTERESTS

- Cooking
- Basketball
- Video making and editing
